

## TABLE MOUNTAIN CREATIVE CONCRETE

**Table Mountain Creative Concrete** is a family owned and operated business specializing in staining, engraving, overlaying and stamping established concrete.

### DRIVEWAYS

We employ a diverse range of colors and textures to meet your needs for refinishing your driveway.

We use three-dimensional texturing tools to create stone, slate and granite finishes in an array of colors and designs. Spray, knockdown, and trowel are also excellent textures for driveways.

We finish the final surface with a sealer to improve resistance to certain chemicals and to provide a gloss, satin, or matte finish that is tough and durable.

The finished surface has sufficient texture to reduce slipping when the driveway is wet, and it is resistant to salts, water-borne chlorides and spalling from freeze-thaw conditions.

**Table Mountain Creative Concrete** has been refinishing concrete for over five years and prides itself in unique and challenging projects. With our experience and the wide range of colors, styles and textures, the possibilities are endless. Feel free to stop by our Wheat Ridge show room to see how we can transform your existing concrete.

## *Transforming Your Existing Concrete*

### **Advantages of Decorative Concrete Overlays for Driveways**

- Excellent adhesion and weather resistance
- Long wearing under traffic
- Retards water and salt penetration
- Resists ultraviolet degradation from long-term exposure to sunlight
- Environmentally safe—overlay is entirely water-based
- Skid resistant underfoot
- Moderate cost
- Long wearing, durable and abrasion resistant
- Cleanable, easy to maintain
- Excellent weathering characteristics
- Chemical resistance
