

**TABLE MOUNTAIN
CREATIVE CONCRETE**

Table Mountain Creative Concrete is a family owned and operated business specializing in staining, engraving, overlaying and stamping established concrete.

GARAGE FLOORS

A garage floor coating is one of the most economical and aesthetically pleasing ways to enhance a plain gray concrete garage floor. These heavy-duty epoxy-based systems not only upgrade the look of the floor, they also increase resiliency to stains and tire marks and hide minor imperfections. With many colors to choose from for the base coating, which can be further enhanced by decorative quartz or paint chips, garage floor coatings give you a wide array of design options.

All of our products carry a manufacturer's limited warranty against excessive fading, delamination and product failure. In addition we provide a workmanship warranty on all of our work. We look forward to talking with you about the specific warranty time-frames for your project.

At **Table Mountain Creative Concrete** we specialize in solving problems. If you have a special project, time schedule or request, come to us!

Advantages of Epoxy Coatings:

- Virtually free of VOCs
- Produces a rapidly installed, decorative seamless floor coating at a moderate cost
- Monolithic. Can incorporate an integral cover base.
- Resistant to many chemicals, including brake fluid, gasoline, many acids solutions and other agents.
- Slip-resistant—An array of slip-resistant surface textures available. ADA compliant.
- Maintenance—built to take repeated scrubbing.

Since 2004, **Table Mountain Creative Concrete** has been providing Colorado's Front Range and Mountain Communities with a wide variety of decorative concrete services for garage floors, including staining, engraving, overlays, and epoxy coatings.
